DETAILED ACTION

Double Patenting

1. Claims 4-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No. 6,330,008, as set forth in the last Office action.

The applicant's preparation for filing a Terminal Disclaimer set forth in the applicant's argument is noted.

Claim Rejections - 35 USC § 102

2. Claims 4-7 are rejected under 35 U.S.C. 102(b) as being anticipated by US patent #5,481,740 (Kodosky).

- As for claims 4, 5: Kodosky teaches a computer implemented method and corresponding system for real-time performance monitoring for a parallel processing engine, comprising the steps/means of:

executing a plurality of processes in parallel to process data,

displaying in real-time graphical representation of the processes and the flow of the data through the processes as the data is processed by the processes (4:37-47, 51-60).
- As for claim 6: Kodosky teaches a real-time computer monitoring system for a parallel processing engine connected to a network, comprising:

a computer connected to a network (9:62 – 10:7, 10:60 – 11: 18; 39:56-57, figures 5, 6) and executing a performance monitoring program, the computer also processing

Art Unit: 2179

commands for controlling the parallel processing engine (10:65-66, 11:37 – 12:52, 29:10-23),

the parallel processing engine automatically executing one or more data flow graphs representing modular programming objects of the parallel processing engine (12:54 – 14:42),

the performance monitoring program receiving real-time performance information about a computation state of the one or more data flow graphs and of components of the one or more data flow graphs (4:40-44, 12:36-39, 47:1-13), and

a display device for providing a real-time graphic visualization of the one or more data flow graphs as a graphic network including the modular programming objects (figs 5A, 115).

- As for claim 7: The parallel execution of one of the data flow graphs produce a score and associated data structure, wherein the data structure are used to store information about the computational state of the data flow graph to be used for its visualization (11:50-62, 13:38-14:42, 20:19-37, 41:12-19).

Response to Arguments

3. Applicant's arguments with respect to claims 4-7 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Art Unit: 2179

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
